

CLEERS WORKSHOP, 9/24/03

Bruce Bunting's presentation entitled "Experience with Diesel Soot Filters" was based on a summary of four DEER Conference presentations. These presentations cover field-work conducted by Bruce when he was an employee of Cummins, Inc, prior to his employment by Oak Ridge National Laboratory. Rather than posting the summary presentation, we have posted the four original DEER presentations. These contain more information and detail than the summary presentation, but were too long to present in total.
